

BAGGING SCALE

- ▶ Single or Double deck scaling
- ▶ Bagging speed: 4 – 10 bags / min
- ▶ 15 – 50 kgs bags can be used.
- ▶ Lower and upper tolerances can be programmed individually. If the result of weighing is out of these tolerances, the material can not be bagged without the consent of the operator.
- ▶ The material level in upper hopper is continuously controlled by the system with level sensors
