'Complete Solutions in Feed Milling Industry'

MEGA COMPACT FEED FACTORY

Our containerized feed mill unit is a high-tech development in feed mill design, built to the size of a standard 20-feet containers. The complete unit is pre-assembled in the factory, thus reducing installation time on site by 80%. The complete electric control is part of the delivery and can be extended to fully computerized system.

Mega Compact Feed Factory comes as a complete solution including all auxiliary units as; full automatic PLC based control system, air compressor, steam generator, oil and molasses adding systems. Just after a very short installation time, you can start running your factory.
